

# 6Pin Cranks

**1**

This is all what you need.

**2**

Now, let's mount Pins and spacer.

### 3

Next step: we mount the hub screw. **Only 2 turns.**

### 4

Move the Pins forwards to touch the spacer.

## 5

Just as described in the picture, the Pins should touch the spacer.

## 5a

.... in this way we touch the spacer with all Pins.....

## 5b

.... following this directions all Pins will touch the spacer correctly .....

## 6

Now tighten the hub screw up to 20Nm

**(ATTENTION: over tighten the hub screw can irreparably damage the crank)**

## Important

- pedals, that have not been tighten enough, can irreparably damage the cranks
- before every ride, please check how pedals and cranks have been tighten
